NOFO No. 2025-GA-02

Notice of Funding Opportunity for the Massachusetts Manufacturing Accelerate Program (“MMAP”) Round 6

Questions and Answers

Date Posted: October 31, 2024

	QUESTION	ANSWER
1.	What sizes of companies are eligible to apply for MMAP/MCP?	The MMAP program is intended for small and medium manufacturers. For the purposes of this program, CAM defines this as manufacturers with 500 employees or less. That said, larger firms are not excluded from applying, and other factors, such as the number of new jobs created and the importance of problems being solved, will also be considered.
2.	If I apply in time for the Batch 1 Review deadline (November 22, 2024) and don't receive an award, do I have to apply again before the Batch 2 Review deadline (March 7, 2025) if my project is the same?	<p>No, you do not need to reapply if your project is the same. If your application is not initially selected for an award, MassTech will still consider your project in the Batch 2 applicant pool. If you have a different project that you would like funding consideration for, you may apply again. In this case, only your second application will be considered for an award.</p> <p>Per the NOFO, equipment that is specified in the application may be ordered once the application has been submitted, however the manufacturer will assume all project costs if the application is not selected for an award.</p>
